Education

Full-Stack Engineer Career Path	Codecademy	Sep 2023 – Mar 2024
<ul style="list-style-type: none">- Coursework: HTML, CSS, Responsive Websites, JavaScript, React, Redux, Node.js, Express.js, PostgreSQL, API development, Data Security, Algorithms & Data Structures		
M.A. Mental Health Counseling	Trinity International University	Sep 2018 – May 2021

Employment

Professional Counselor	Stenzel Clinical Services	June 2021 – Present
<ul style="list-style-type: none">- Employ empathetic communication and active listening skills to understand client needs and tailor support, demonstrating a client-centered approach to problem resolution.- Design, implement, and update personalized treatment plans, utilizing analytical skills to assess progress and adapt strategies, ensuring alignment with evolving client goals.		

Software Projects

Inventory Management Application – Full-Stack MERN App

- Developed an inventory management application using MongoDB, Express.js, React, Redux, and Node.js to track product stock levels for individual users.
- Engineered user authentication and session management to ensure secure access and data protection, integrating functionalities for password encryption and user registration and login.
- Designed and implemented a responsive user interface with React, enabling user interactions for adding, viewing, and deleting product entries.
- Implemented a RESTful API with Node.js and Express to handle inventory operations and data management.
- Utilized MongoDB for scalable data storage.

Jammming – React Web App

- Developed an interactive web application using React, enabling users to search Spotify for songs through intuitive UI components and responsive design.
- Integrated Spotify's Web API to fetch real-time data, allowing users to create custom playlists and export to the user's personal Spotify account.
- Designed and executed functionality to authenticate users and securely connect their personal Spotify accounts, ensuring user data privacy.

Personal Portfolio Website

- Implemented a personal portfolio website utilizing HTML, CSS, and JavaScript to showcase my software development projects and professional information.
- Designed a user-friendly interface with responsive web design techniques to ensure successful viewing across various devices and screen sizes.
- Integrated EmailJS to enable a functional contact form, allowing visitors to send emails directly from the website without server-side code, thereby streamlining communication and increasing engagement.

Skills

JavaScript, HTML, CSS, React, Redux, Node.js, Express.js, PostgreSQL, MongoDB, Git/GitHub, Postman, SQL
